

Automatic Roof Hatch Opener

Ensure safety and compliance with the SafePro Automatic Roof Hatch Opener. This system allows for the unlocking, locking, and lifting of the hatch lid from ground level, providing secure ladder climbs and safer access through the roof opening. Operated via a convenient push button, it eliminates open hole violations in accordance with OSHA Regulation 1910.29. The 110V model offers reliable performance, making it an essential addition to any rooftop access point.

Features and Benefits:

- Supports OSHA and Cal/OSHA compliance
- Automatically open, close, lock and unlock
- Retrofit to various roof hatch brands and sizes
- Simple installation
- Powered by 110V AC
- Access with keypad or remote
- Factory assembly to hatch available (hatch sold separately)
