Automatic Roof Hatch Opener – Approved Hatch Models

Effective Date: July 6, 2026

Automatic Roof Hatch Opener kits are intended to support a broad range of roof hatch configurations; however, variations in hatch design may affect fitment and installation requirements. The table below identifies hatch models that have been vetted for compatibility. Additional hatches with similar material properties, dimensions, and latch mechanisms may also be retrofitted successfully. SafePro Safety also works with integrators capable of providing turnkey custom configurations for project-specific hatch applications.

Brand	model #	size (HINGExLENGTH)
Babcock Davis	BG3630	30x36
